

WELD SEAM^{INC}

Custom Welding Specialists for Industry

www.weldseam.com • 875 Lively Blvd. Wood Dale, IL 60191 • Phone: 773-588-1012 • Fax: 773-588-1026 • info@weldseam.com

Mission Statement

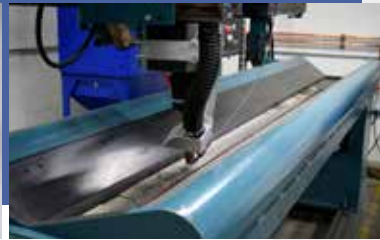

Weld Seam, Inc. will provide cost effective and timely delivery of products in accordance with our high quality fabrication techniques and state of the art facility.

Welding Services

- Capabilities in both TIG and MIG • New crane systems for material handling of larger weldments
 Multiple Bluco Modular Fixturing Tables to fabricate detailed weldments • Hand and spot welding
 • Automatic seam welding machines for both longitudinal and circumferential welding •

SEAM WELDING

- Eight automated seam welders from 3 to 6 feet
- Two 16 foot seam welders allow a 192" weld in one continuous pass
- Thicknesses from 26GA to 3/8" plate in all weldable materials: stainless, aluminum, steel, copper, inconel, titanium, brass, and more

CIRCUMFERENTIAL WELDING

- Production floor with 5 lathes
- Including three Jetline precision lathes
- We can accommodate welding heads on tanks/cylinders from diameters ranging from less than 4" to more than 30"

Rapid Prototype Manufacturing

Our rapid lead times at our new state of the art facility provide our customers with quality parts produced as quickly as possible.

Send your inquiries to info@weldseam.com for a quote in 24 hours or less.

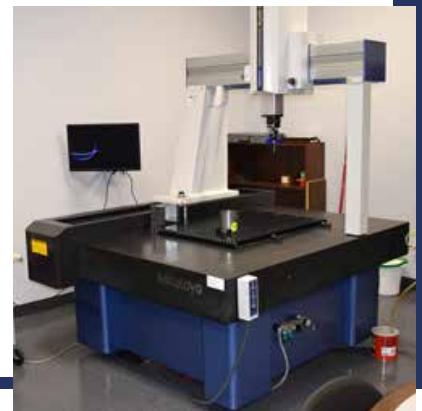

Quality Policy

Weld Seam, Inc. will provide quality products and services that meet or exceed our customer's expectations and will employ continuous improvement processes to meet or exceed those expectations.

MEASUREMENT LAB

Safety and quality are number one here at WeldSeam. Our lab has state-of-the-art measuring equipment that includes:

- Calipers
- Micrometers
- Profilometers
- Linear Height Gauges
- Granite Measuring Plates
- Mitutoyo Crysta PM7106 CMM System

Additional Services

ROLL FORMING

- Equipment includes initial pinch, 2-roll, 3-roll, and 4-roll machines
- CNC controls allow more complex shapes
- Custom programming ensures consistent tolerance

PLANISHING

- Four planishing machines on our floor
- Removes weld build-up and flattens seams
- Cold process performed on all flat, formed, and circumferential welds

SHEARING

- Three mechanical Wysong shears
- Thickness ranging from 26GA to 3/8"
- Material length up to 144"
- CNC backgauge & CNC Automec frontgauge controls

STAMPING/ETCHING

- Two Telesis marking systems can etch just about anything
- Stamping and etching of numbers and letters
- Computerized controls mark unique patterns
- Etching can be used on plastic, paper, and many other surfaces

PARTS WASHING

- Automatic
- Aqueous based
- Accommodates parts
 - up to 60" diameter
 - up to 60" height
- Parts washer by Better Engineering

Weld Seam provides automated seam welding for sheets, plates, cylinders, cones, ovals, boxes, rings, and much more! We can provide TIG and MIG welded parts using a combination of hand and seam welding. Our capacity ranges from 1-2 (prototypes) all the way to production runs of 10,000 to 15,000 parts per month. We have a quality system and certified welders to meet all of our customer's requirements.

Industries Served

Nuclear Power

Automotive

Food Processing

Packaging

Aerospace

Defense Department

Water Treatment

Lighting

Manufacturing
